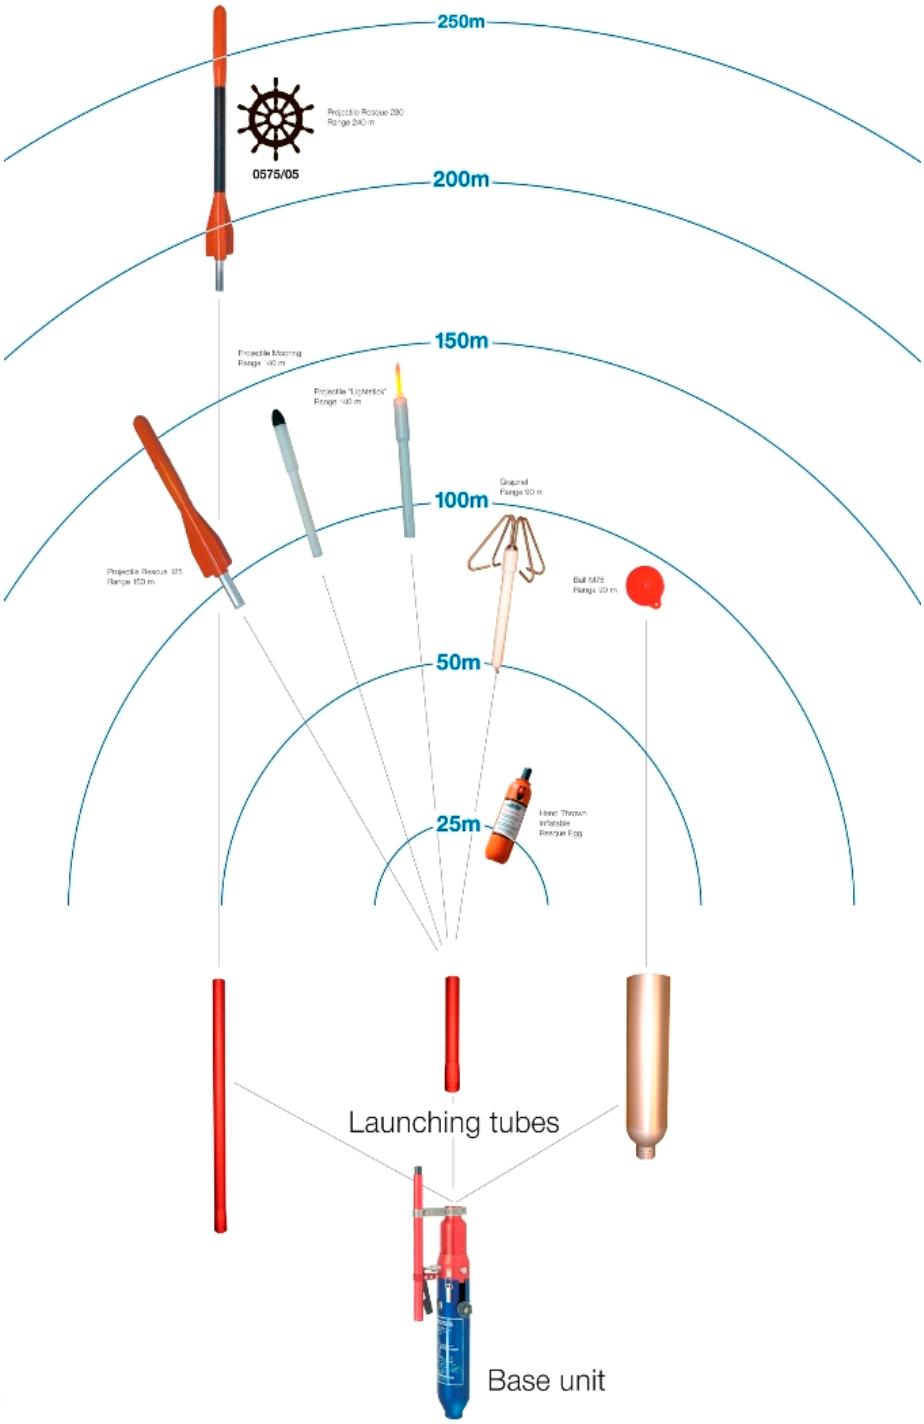
RESTECH NORWAY A/S

PLT® PNEUMATIC LINE THROWERS
SAFETY, SURVIVAL & RESCUE

Pneumatic Line Throwers

PNEUMATIC LINE THROWERS

- The PLT® is a line throwing system based on compressed air as propellant.
- No flames or sparks when used. Ideal for use in Oil and Gas environments.
- All projectiles are re-useable.
- Easy aiming and very directional, even in heavy side-wind.
- Long life. Made of materials with long durability in maritime environments.
- Low cost use. Refilling of compressed air is all you need.
- The various launching tubes fits the same base unit and gives you access to a range of different projectiles for different applications.



We also have a smaller shoulder launched model that operates with air or CO2. And with a variety of projectiles
