

## PLT® - Rescue 125

Art no 3000

### Description:

Line Throwing device with Rescue Projectiles. Intended used for smaller vessels that do not require a line throwing device complying with the Solas regulation.

### Base unit :

The base unit contains a built-in air cylinder for filling of compressed air up to 200/300 bars (2900/4350psi). This is sufficient for 4/6 shots before refilling is necessary. The air cylinder is fitted with standard fittings for diving and BA-equipment for filling of dry clean air from a high-pressure compressor.

### Projectiles :

Delivered with four Rescue Projectiles and one Training Projectile. The Rescue Projectiles are made of ABS plastic with aluminium inner tube. The Rescue Projectiles are filled with 170m (186yd) nylon line, and can be re-loaded and re-used. The Training Projectile is made of POM-plastic with a rubber tip. It does not carry the line inside, but a linebox with 120m/5mm (131yd/0.2in) line is enclosed for training.

### Loading-device:

Delivered with injector w/handle for reloading the Safety-line into the Rescue projectiles. Simply connect to compressed air 5-10 bars (72-145psi) and the line is easily injected into the projectile.

### Technical data:

Shooting range	min 140-160m (153-175yd)
Line strength	min 2000N
Line thickness	3,2mm (0.13in)
Flight time	ca. 4 second
Recoil	max 5400N
